

Daily Paths — Android QA Checklist

v2.6.0 build 33

Launch & Navigation

- App launches to Today screen
- All 5 tabs load (Today, Notebook, Prayers, Speakers, Settings)
- Tab switching is smooth, no flicker or blank screens

Today (Daily Reading)

- Today's reading loads on launch
- Navigate to past/future dates via date picker
- Bookmark and unbookmark a reading
- Share a reading via native share sheet
- Create a journal entry from the reading screen
- Bookmark instruction overlay shows on first use only

Journal / Notebook (Premium)

- Create an entry for each type: Journal, Gratitude, Reflection, Testimony
- Edit and save an existing entry
- Delete an entry (confirm dialog appears)
- Guided prompt questions render correctly

Prayers (Premium)

- Built-in prayers load and expand/collapse
- Bold phrases render correctly ("Just for today", etc.)
- Create, edit, and delete a personal prayer
- Hide/show a built-in prayer
- Custom text override on a built-in prayer persists

Speakers / Audio (Premium)

- Speaker list loads
- Tap speaker - detail opens, audio auto-plays
- Play/pause, seek via progress slider
- Adjust playback speed
- Audio continues when switching tabs

- Download a speaker for offline playback
- Now-playing indicator shows in browse list
- Audio plays with device on silent/vibrate

Settings

- Change text size (all 5 options) - verify across screens
- Switch themes: Light, Dark, System
- Premium themes accessible only when subscribed
- Enable/disable daily reminder, set time
- Send feedback (with and without email)
- Rate app triggers in-app review dialog (Android) / opens App Store review (iOS)
- Share app via native share sheet
- Privacy Policy, Terms, Support links open correctly
- Version and build number display correctly (2.6.0, build 33)
- Long-press version number opens QA logs

Subscription & Paywall

- Free user sees paywall when tapping premium tabs
- Trial days remaining display correctly
- Purchase flow completes successfully
- Subscription restore works
- Lifetime purchase unlocks all features
- Trial expiration modal appears when trial ends

Notifications

- Permission request fires on first enable
- Notification arrives at set time
- Tapping notification opens today's reading
- Disabling reminder cancels scheduled notifications

Dark Mode & Theming

- System theme toggle (Android dark mode) updates app
- Text readable in both light and dark modes
- All screens respect selected theme

Offline & Network

- Cached reading loads without network
- Downloaded speaker audio plays offline
- Graceful error handling when network is unavailable

Persistence

- Journal entries survive app restart
- Personal prayers survive app restart
- Theme, text size, reminder settings persist
- Bookmarks persist

Background & Lifecycle

- Audio continues in background
- App resumes correctly after being backgrounded
- OTA update banner appears when update available
